May 8, 1992

Dear Ms. Sullivan:

Please accept this letter as a formal request for an extension of the comment period that is scheduled, for the Skinner Landfill Superfund Site, to end on May 27. It is my understanding that a 30 days extension may be honored, if it is requested within two weeks of the start-up of the public comment period.

CLEAN has committed to contact and inform the public of the alternatives that were considered in the Feasibility Study and the EPA's proposed plan. We are currently in the process of mailing information to the public which we feel is most likely to be impacted by whatever plan is adopted by EPA.

We are all concerned that this landfill be remedied in a thoroughly responsible manner with minimal risk to the public at large. Again, while timeliness is important, correctness is a priority.

We look forward to your reply on whether an extension of the comment period will be favorably considered.

Sincerely yours,

Lisa Whitacre, Secretary  
CLEAN, Inc.
